

Downloading New Optimizer for faster surfing

Dear Subscriber:

WildBlue has released a new version of its Windows Optimizer, the software tool that enables you to surf the web faster. With the Optimizer, web pages that you visit frequently load quickly, saving you time!

Please follow these instructions for using the new WildBlue Optimizer:

1. Download the WildBlue Optimizer by clicking the link on the Powwwer.net home page. When the pop-up box appears, click on **Save** to save it to your PC hard drive or desktop. Do **not** click **Run**.
2. Close all internet browser windows. (If you do not close them all, the WildBlue Optimizer will not install properly.)
3. Double click on the Optimizer program and follow the prompts. The file name to click is **NRTC.exe**
4. After the WildBlue Optimizer has finished running, enjoy surfing the web again.

As soon as WildBlue releases the new Optimizer for MACs, we will let you know. In the meantime, if you have any questions or difficulties, please contact 1-888-223-0460.

Thank you!
